Brian Smith

Retired, unless you have something really interesting that you think I might like to do...

San Francisco Bay Area

Summary

Now retired, my most recent position was as an escalation engineer working on Microsoft Planner and Project in all its variations. I ran the Project Support blogs at <https://techcommunity.microsoft.com/t5/project-support-blog/bg-p/ProjectSupport> and the Planner and Project blogs at TechCommunity. My route to technology came via research photographic chemistry transitioning to the implementation of ERP systems - going through UNIX to Windows along the way. I'm interested in photography and getting into 3D software - hence my @briansmith.photos Instagram handle. I also stay interested in all thing Project.

Experience

Microsoft Corporation

Snr Escalation Engineer

December 2002 - December 2024 (22 years 1 month)

100% Remote

Watkins Associates

Consultant
